

First Degausser with pre-paid functionality!

Every company and institution is legally obligated to remove data from devices and electronic media, that are intended for utilization, passing or repairing. ASM120 by Pro Device is perfect choice for small companies and big corporations.

Many companies have problem with confidential information, that are stored on data media, and must be destroyed. File deletion in common way doesn't mean that file was removed physically. IT expert is able to recover data even from formatted disk. One of the most popular way of data elimination is degaussing with using of specialist equipment like degausser device.

ProDevice ASM120 is the first automatic polish degausser, that generates magnetic field of 11.000 Gauss. With this device user has warranty of data removal from high capacity media. Degaussing will also permanently erase the data from non-functioning hard drives and data tape allowing the media to be safely returned to the manufacturer or to be disposed. ASM120 is very "user friendly" you just have to place media into the drawer and after approximately 30 seconds, tape or hdd is degaussed. Specially profiled holders makes it easy to move.

CD ProDevice

First Degausser with pre-paid functionality!

The ProDevice is high quality device for data elimination from magnetic media. After degaussing, information from LTO, 3592, T10K etc. and hdd 2,5"/3,5" are irrecoverably lost. Some older tapes like DLT, DDS, audio or video (analogue) cassettes after degaussing don't lose their magnetic properties and can be re-used.

ASM120 is INNOVATIVE device, easy to use . Equipped with LCD display, that indicate number of media that has been degaussed in one session and total number of degaussed media by device.

ASM120 is equipped with software, that store historical data like: date, number of eliminated data, number of cycles and estimation of generated impulse. What is important, memory keeps 1000 records, in case of data bank is filled, the old one is overwritten.

Pre Paid Option: Comparing to other devices, ASM120 enable setting up permitted number of erase cycles, after crossing set up level device will block and we will need to buy new license for degaussing ability.

Three modes of operation:

- service – only for producer
- administrative – for customers, who bought ASM120
- users - for customers who rented degausser, there is a possibility to remote Pre Paid device for established number or erase cycles. It is guaranteed by PPMS (Pre Paid Management System) Technology

Media intended for degaussing:

- All types, format and size hard disk drives
- Magnetic Tapes: LTO1-LTO5, DLT, SDLT, DDS, DAT, AIT, Travan, SLR, QIC, 3592, 3590E, 3490E, 3480, 9840, 9940, T10K, VHS
- Floppy disks, audio and video cassettes

Technical specification:

Max. Media Size	200 x 120 x 50mm
Magnetic Field	1,1T = 11 000 Gauss
Cycle time	30 seconds per cycle
Power supply	115V, 230V / 50Hz, 60Hz
LCD	Yes
TCP/IP interface (communication with software tools)	Yes
Dimensions	(W)200mm x (H)465mm x (D)325mm
Weight:	30 kg
Warranty:	24 Months standard with optional 3 or 5 year warranty extension
